

## ReThinking AIDS-- READING LIST

One of the most in-depth sources of information is--> [www.theperthgroup.com/](http://www.theperthgroup.com/).

This site is not for the person wanting simple answers. These articles are long and technical.

My experience is that, even if I do not understand some of the more technical information, the primary points of agreement and disagreement are clear. If nothing else I see the complexity of this "syndrome of issues".

05.21.05

This reading list is from the HEAL Portland web site: [http://heal\\_portland.tripod.com/](http://heal_portland.tripod.com/)

I have made some additions and have not verified the accuracy of all spelling and authenticity of all sources dates etc. This is an "in process document" and may lack a high level of accuracy.

kobe; portland, oregon

-----  
A very important web page is: <http://www.virusmyth.net/aids/index.htm>

-----  
Many reprints of relevant Basic Info AIDS Myths articles are in pdf format on my web page:

[www.goodboyproductions.com](http://www.goodboyproductions.com) .

Go to the Resources page.

-----  
For hard-to-find books, try "A Different Light Bookstore" - Books by mail: 1-800-343-4002. Many may be available at the Multnomah County Library (Central).

-----  
1. Maggiore, Christine. What if everything you thought you knew about AIDS was wrong? fourth edition by The American Foundation for AIDS Alternatives  
11684 Ventura Blvd., Studio City, Ca 91604

<http://www.aliveandwell.org/>

In addition to this book, Christine and her partner Robin have created a documentary film: The Other Side of AIDS

--also available on DVD from the online store page of <http://www.aliveandwell.org/>

1. Chaitow, Leon. You don't have to die: Unraveling the AIDS Myths Future Medicine Publishing, Inc. 10124 18th Street, Court East Puyallup, WA 98371 1.800.435.1221

2. Marsa, Linda. Prescription For Profit: How the Pharmaceutical Industry Bankrolled the Unholy Marriage Between Science and Business. NY, Scribner, 1997.

A well-researched and written study of Robert Gallo's scientific mischief as the so-called discoverer of the virus called HIV which he actually stole from the French. The scientific fraud which she uncovers is pretty frightening. Also included is a close, not-so-flattering, look at the way in which the small bio-med company, Genetech, pushed its new heart medicine, Activase. A must-read for anyone interested in the "real" story behind HIV.

3. Hodgkinson, Neville. AIDS: The Failure of Contemporary Science. London, Fourth Estate, 6 Salem Rd., London UK W2 4BU, 1996.

(Not published in US. Available from "Book service By Post", PO Box 29, Douglas, Isle of Man, IM99 1BQ.)

A penetrating analysis of the current AIDS scene and an erudite discussion of various “dissident” views of HIV and the causes of AIDS by the former medical correspondent / editor of the Sunday Times of London. Hodgkinson discusses the theories of Dr. Joseph Sonnabend, John Lauritsen, Dr. Gordon Stuart, Dr. Peter Duesberg, AIDS in Africa, and most importantly, the HIV theories of the Perth, Australia research team headed by Dr. Eleni Papadopulos-Eleopulos.

4. Adams, Jad. AIDS: The HIV Myth. New York, St. Martin's Press, 1989.  
An excellent survey of the 1989 AIDS scene. Adams also discusses the reasons that many in the scientific community are not convinced by the HIV=AIDS construct.
5. Callen, Michael. Surviving AIDS. New York, Harper Collins, 1990. In paper.  
A very hopeful collection of interviews with long term survivors. The opening and closing chapters are especially strong. Callen describes the preventive treatments he has undergone which have prolonged his life for many years. He is very much against taking AZT.
6. Duesberg, Peter A. INVENTING THE AIDS VIRUS. Washington D.C., Regnery Press, 1996, \$29.95. Distributed by National Book Network, Lanham, MD.  
Since 1987, Prof. Peter Duesberg, Professor of Molecular / Cell Biology at UC, Berkeley, has been the most outspoken scientist challenging the I-HIV=AIDS hypothesis. He describes HIV as a “passenger virus”- the result of a weakened immune system, NOT the cause. He attributes the loss of T-cells and the break down of the immune system to the continued, regular use of IV drugs, recreational drugs and prescription drugs like AZT and other antivirals. This is a very thorough presentation of his ideas for the general reader.
7. Duesberg, Peter H. Infectious AIDS. Have We Been Misled?  
North Atlantic Books, PO Box 12327, Berkeley, CA 94712, \$18.95.  
In this collection of 13 articles, originally published in scientific journals from 1987-1995, he calls into question the dogma of infectious AIDS.
8. Duesberg, Peter and John Yiamouyiannis. AIDS. (1995, Paper, \$17 from Health Action Press, 6439 Taggart Rd., Delaware, OH 43015.)  
A very clear, precise and well documented account of Prof. Peter Duesberg's ideas regarding AIDS, its causes, the use of AZT, AIDS in Africa and pediatric AIDS. A very important presentation.
9. Lauritsen, John. The AIDS War: Propaganda, Profiteering and Genocide from the Medical-Industrial Complex. New York, Asklepios, 1993.  
A collection of essays, most of which originally appeared in the New York Native, by AIDS activist, John Lauritsen, which support Peter Duesberg's ideas that HIV is mainly caused by the use of drugs including recreational drugs, including poppers. The book contains an excellent chapter on what to do if one tests HIV positive. Lauritsen is very much against the taking of AZT.
10. The AIDS Cult: Essays on the gay health crisis. Edited by John Lauritsen and Ian Young. 1996, Pagan Press, Box 1902, Princtown, MA 02657, \$15 directly from publisher.

The six essays examine psychological and cultural issues - the ways religious intolerance, group fantasies, toxic drugs, pharmaceutical propaganda, deadly counseling, and a Cult of Doom have acted together to destroy the health of gay men. The writers take aim at such targets as the Moral Majority, the AIDS Quilt, AIDS counsellors, the Public Health Service, and the pharmaceutical industry.

11. Rappoport, Jon. *Scandal of the Century*. Foster City, Human Energy press, 1988.
12. Root-Bernstein, Robert. *Rethinking AIDS. The Tragic Cost of Premature Consensus*. New York, The Free Press, 1993.  
One of the most impressive and convincing books that challenges the HIV=AIDS hypothesis. Root-Bernstein, a Prof. at Mich. State Univ. and a holder of a McArthur Fellowship, contends that the disease is multifactorial. The book is well documented.
13. Burkett, Elinor. *The Gravest Show On Earth: America in the Age of AIDS*. Houghton Mifflin Co. (Boston/NY) 1995, \$24.95.  
A hard-hitting, well informed account of AIDS during the past decade. She covers key personalities, AIDS theories, the infighting of AIDS organizations, questions of PDA approval of drugs, the Kimberly Bergalis story, plus much more. Also in paper with a new forward which covers new AIDS developments occurring in 1996.
14. Schmidt, Dr. Michael A. & Dr. Lendon Smith, Dr. Keith Sehnert. *Beyond Antibiotics: Healthier Options for Families*. Berkely, North Atlantic Books, 1993, paper.  
Warns about the overuse of antibiotics - a major problem in the late 20th century - and how overuse is creating antibiotic resistant bacteria a weakening of the immune system. A "must-read" for people interested in building up their immune system. A good description of the immune system is offered on p. 63ff. Chapter 9 offers advice on how to boost the immune system naturally.
15. Shenton, Joan. *Positively FALSE: Exposing the Myths Around HIV and AIDS*. New York, St. Martin's Press, 1998.  
A prize-winning medical journalist in the UK, Joan Shenton has produced for Channel 4 TV (UK) a number of influential documentaries which question many of the assumptions regarding the cause of AIDS and AIDS in Africa. In this gripping book, she vividly describes the trials and tribulations that went into putting together these programs.
16. Crewdson, John. *Science Fictions. A Scientific Mystery, a Massive Cover-up, and the Dark Legacy of Robert Gallo*. Boston, Little, Brown &Co., 2002.  
An astonishing book that lays out in great detail all the scientific fraud, mis-statements, underhanded dealings that Robert Gallo, the so-called discoverer of HIV and the antibody test for HIV, and his lab participated in during the early 1980's. Reviewed in *The New York Times Book Review*, March 3, 2002.
17. (16) Null, Gary with James Feast, *AIDS. A Second Opinion*. New York, Seven Stories Press, 2002.  
A very complete explication of AIDS as viewed by the famous nutritionist, alternative health authority and AIDS "dissident," Gary Null. He covers all aspects of AIDS but the most important section is on alternative treatments for AIDS illnesses.
